

L'étude de la migration comme outil d'évaluation des niveaux d'abondance des populations d'oiseaux : bilan de 26 années de suivi (2)

1ères Rencontres Nationales de la Migration, Bidarray 13,14,15 juin 2008

Jean-Paul URCUN, Organbidexka Col Libre

Exemples d'espèces qui augmentent

- Circaète Jean-le-blanc
- Milan noir
- Epervier d'Europe
- Balbuzard pêcheur
- Cigogne blanche
- Cigogne noire
- Grand Cormoran
- Grue cendrée

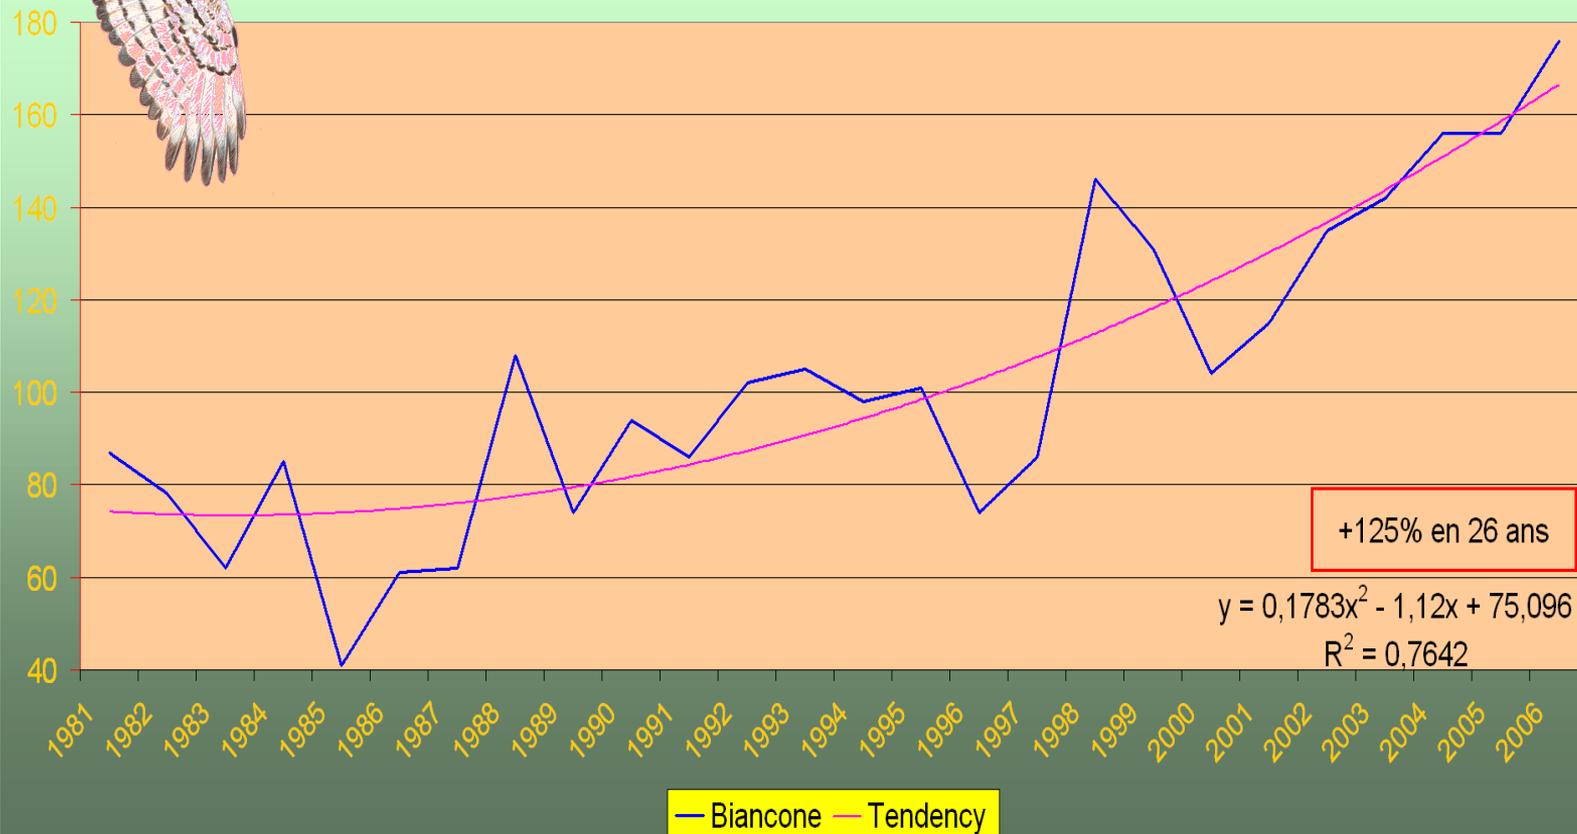

Circaète Jean-le blanc

Biancone

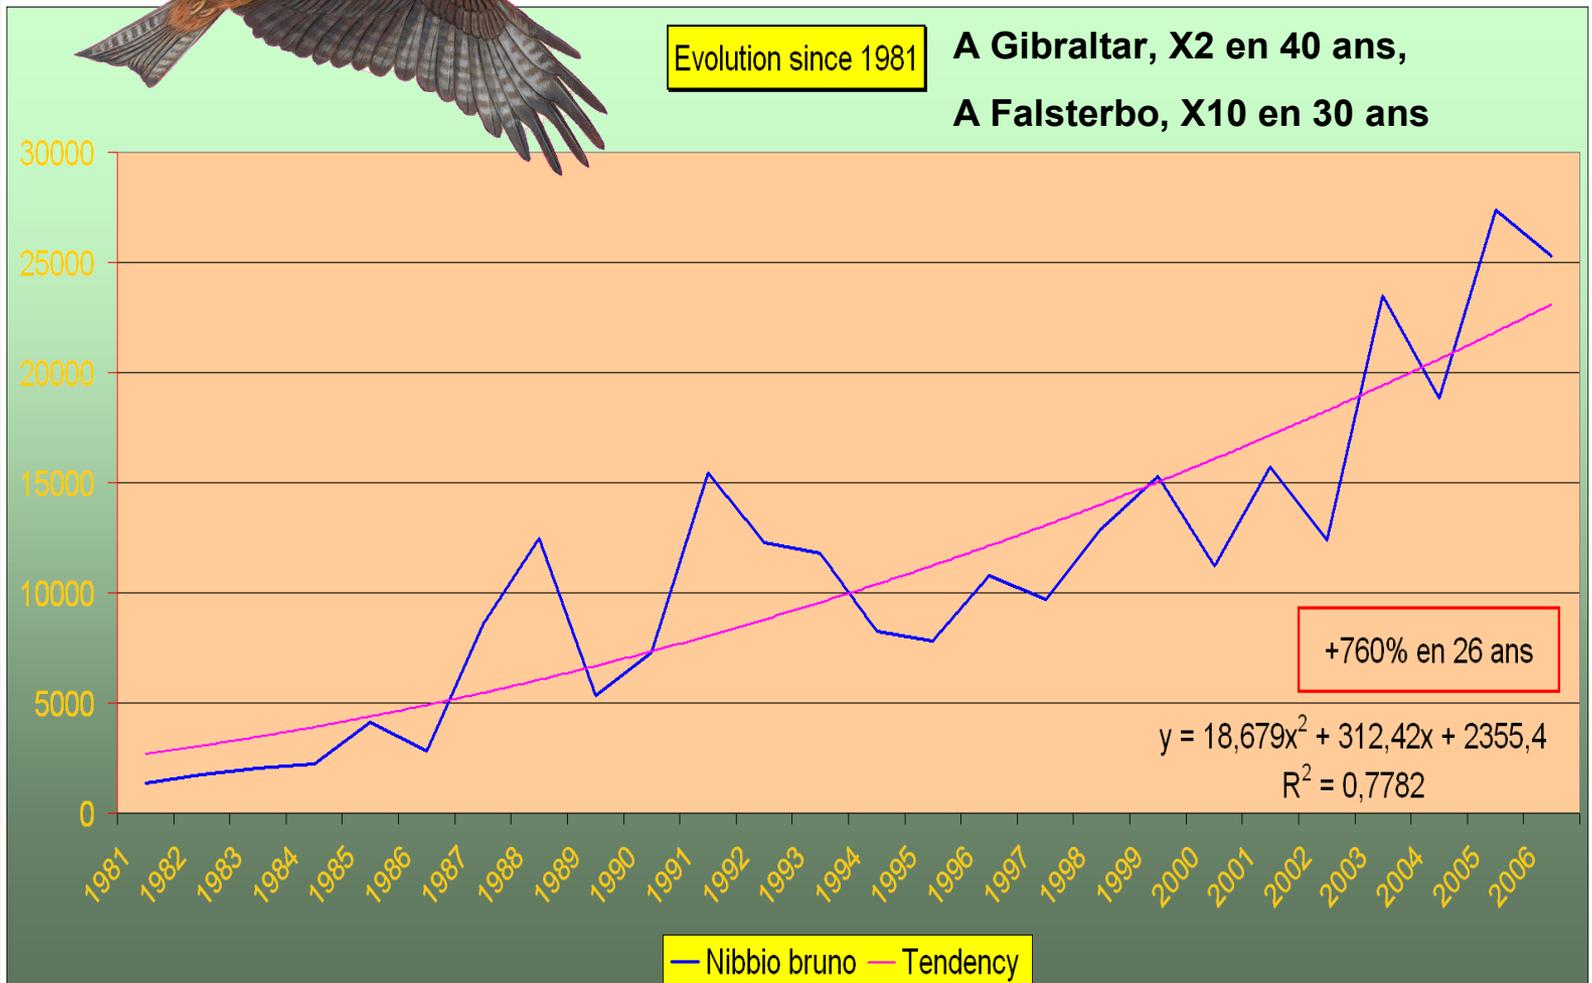

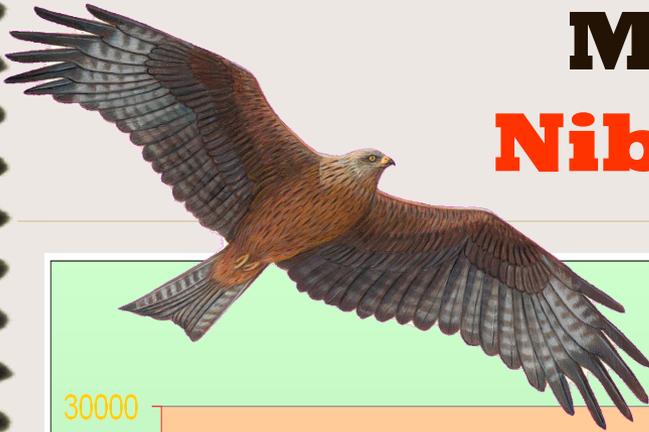

Evolution since 1981

A Gibraltar, pas de changement,

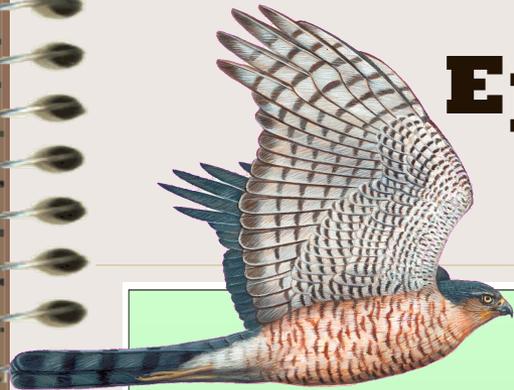

Milan noir

Nibbio bruno

Epervier d'Europe

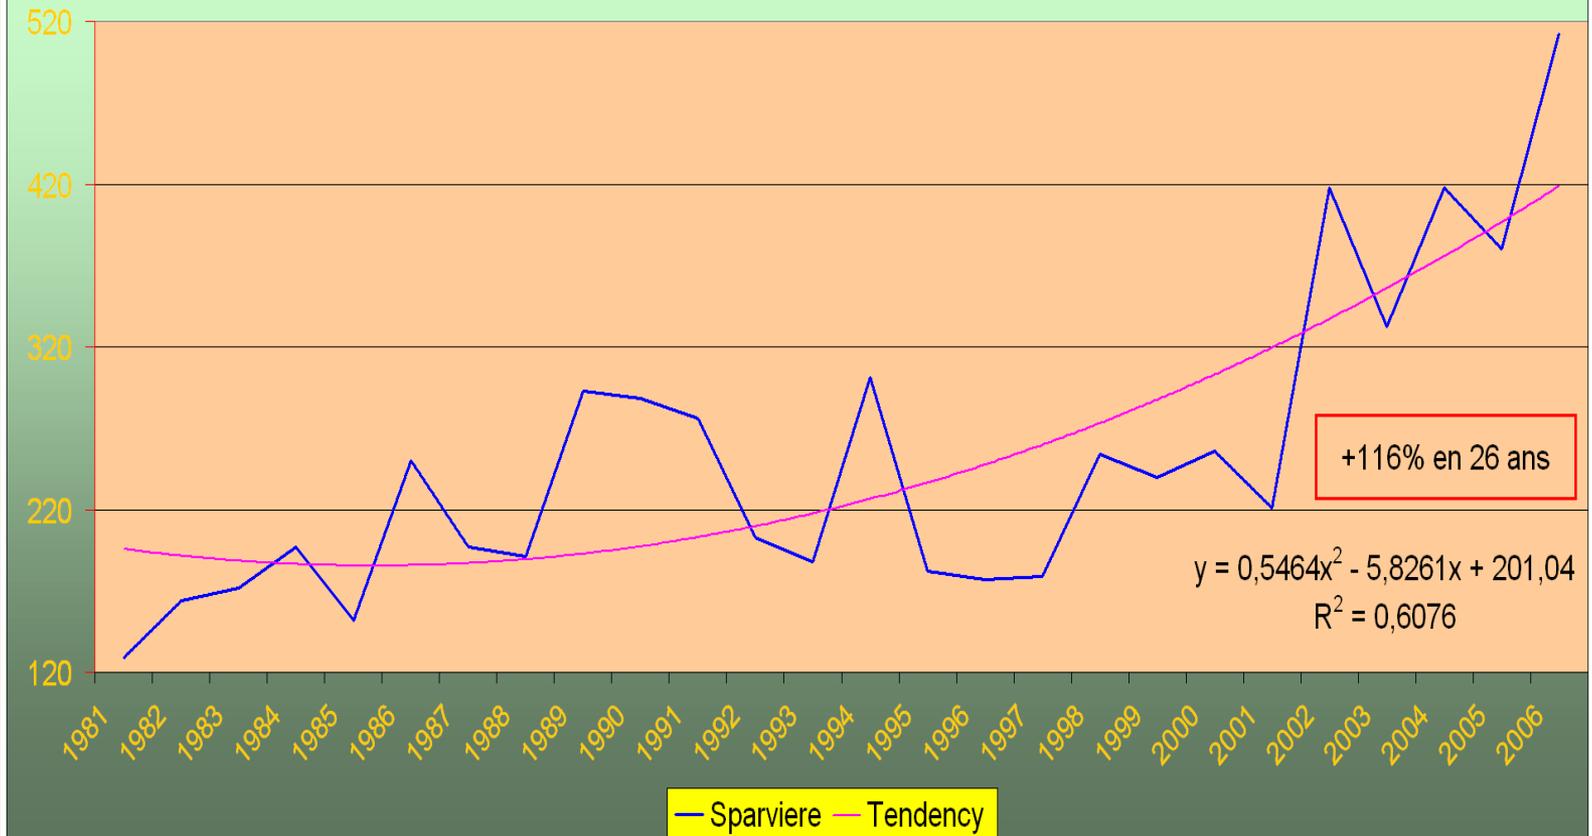

Sparviere

Evolution since 1981

A Gibraltar, X1,25 en 40 ans,

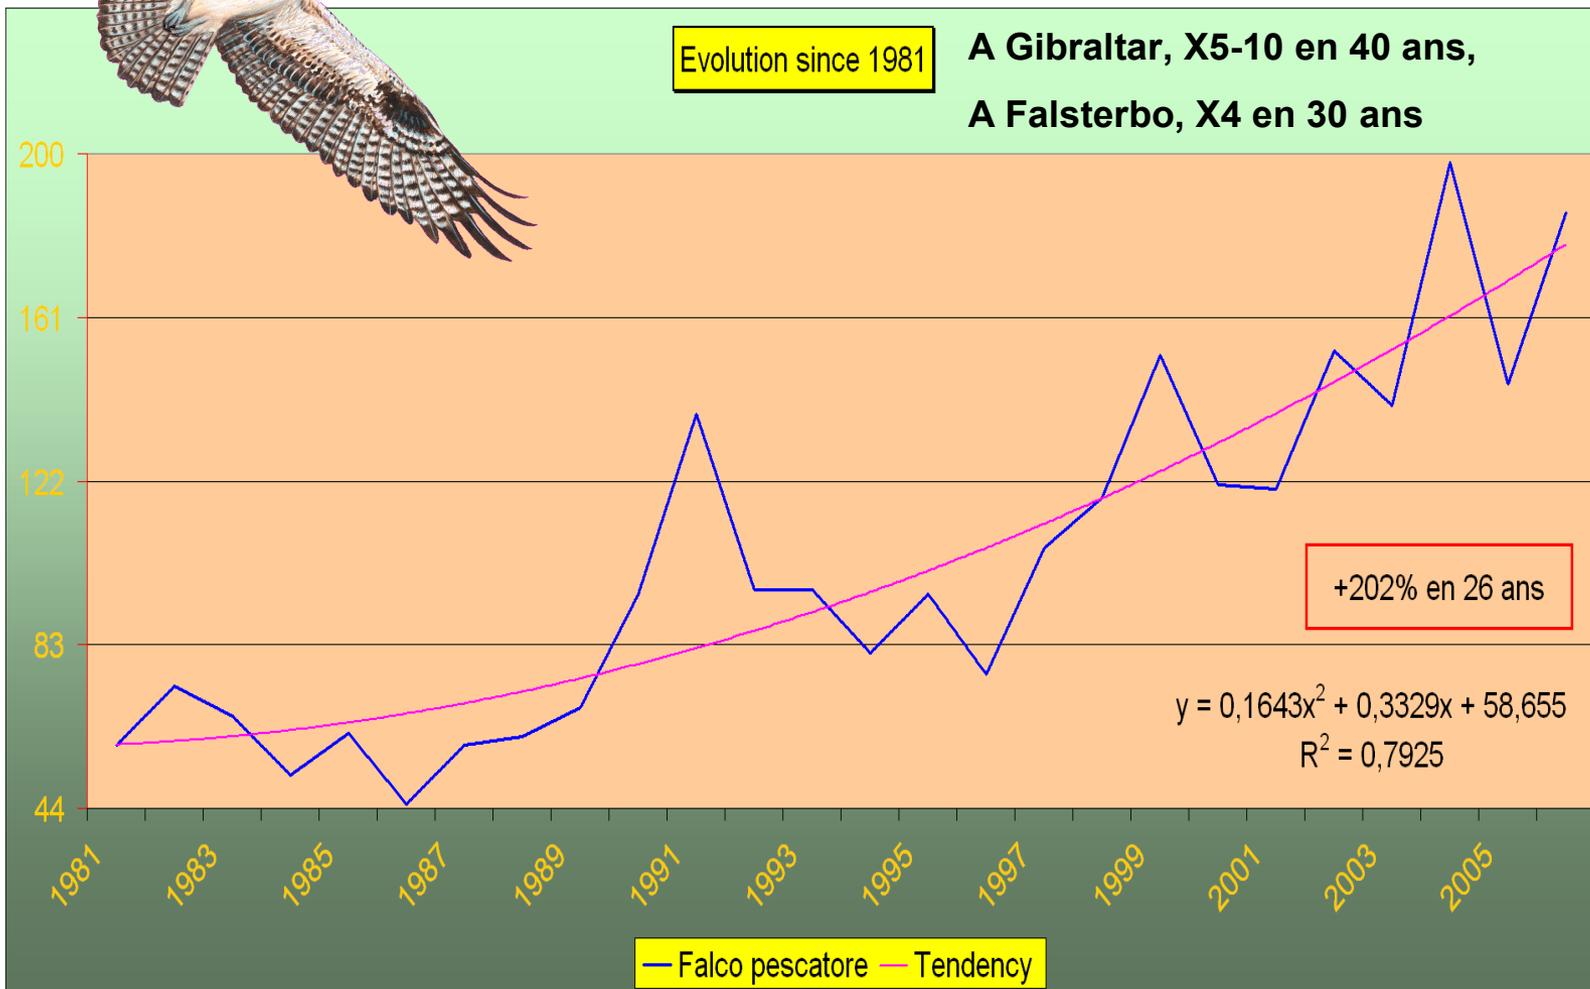

A Falsterbo, X3 en 70 ans

Balbuzard pêcheur

Falco pescatore

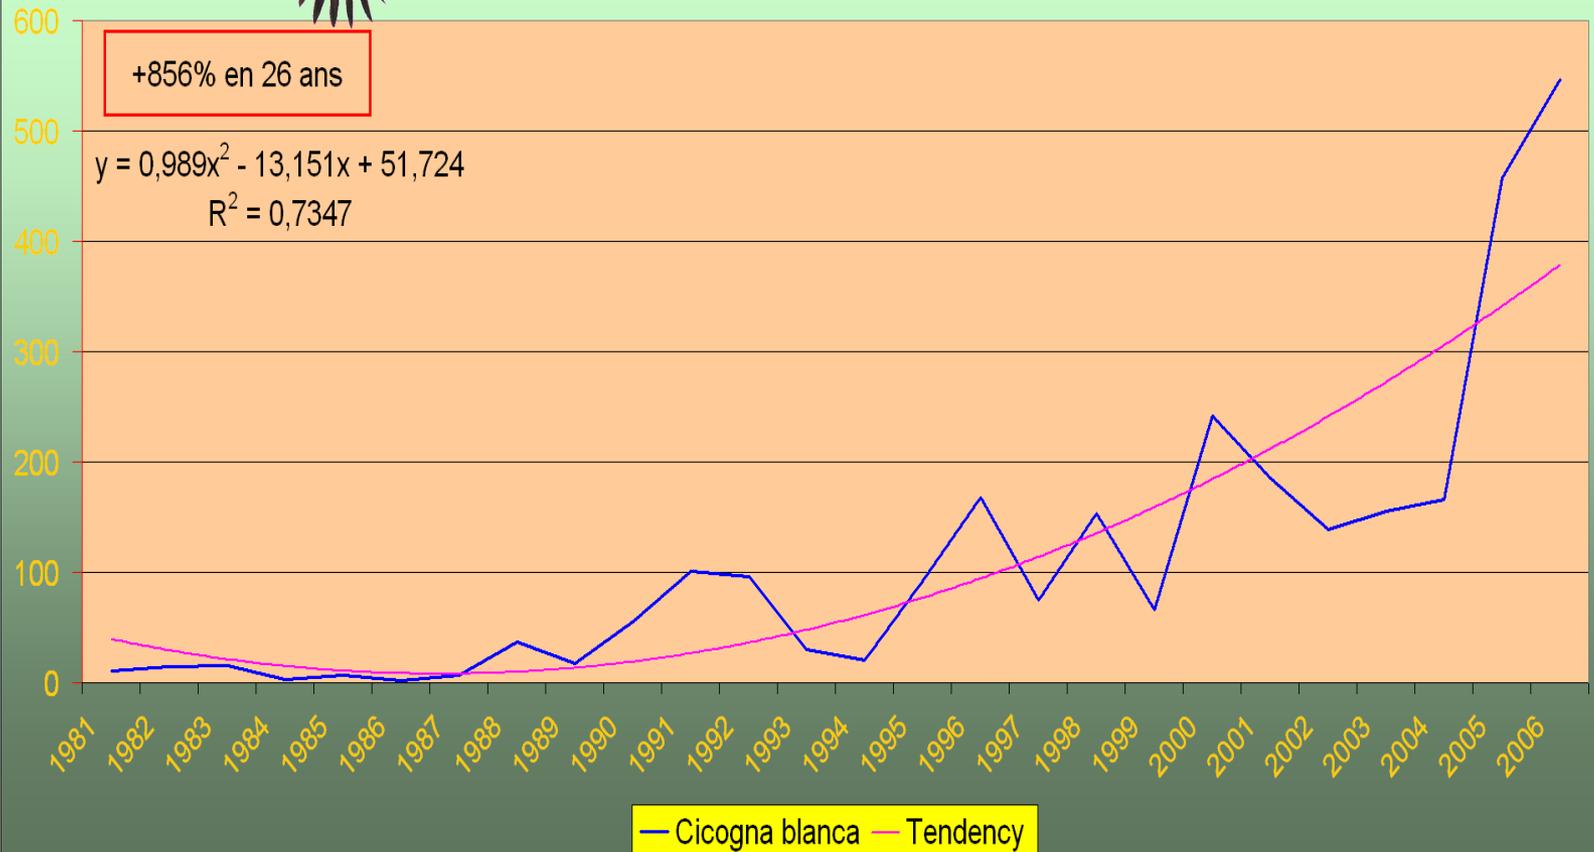

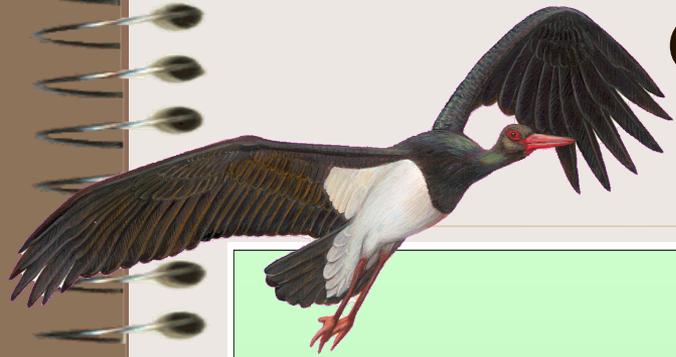

Cigogne blanche

Cicogna bianca

Evolution since 1981

A Gibraltar, X3-4 en 40 ans,

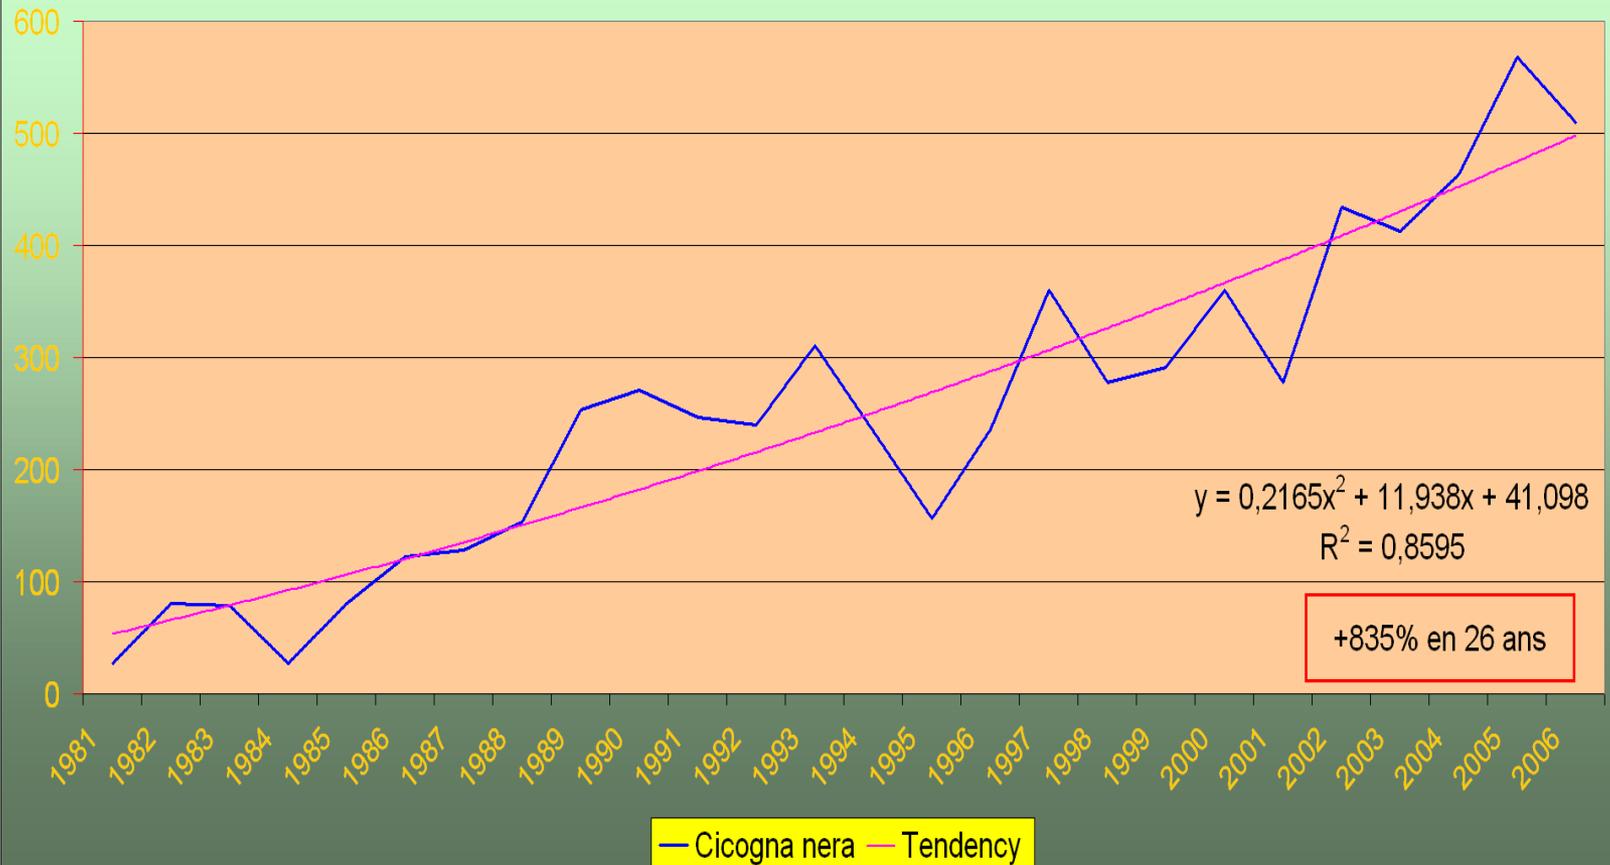

Cigogne noire

Cicogna nera

Evolution since 1981

A Gibraltar, X7 en 40 ans

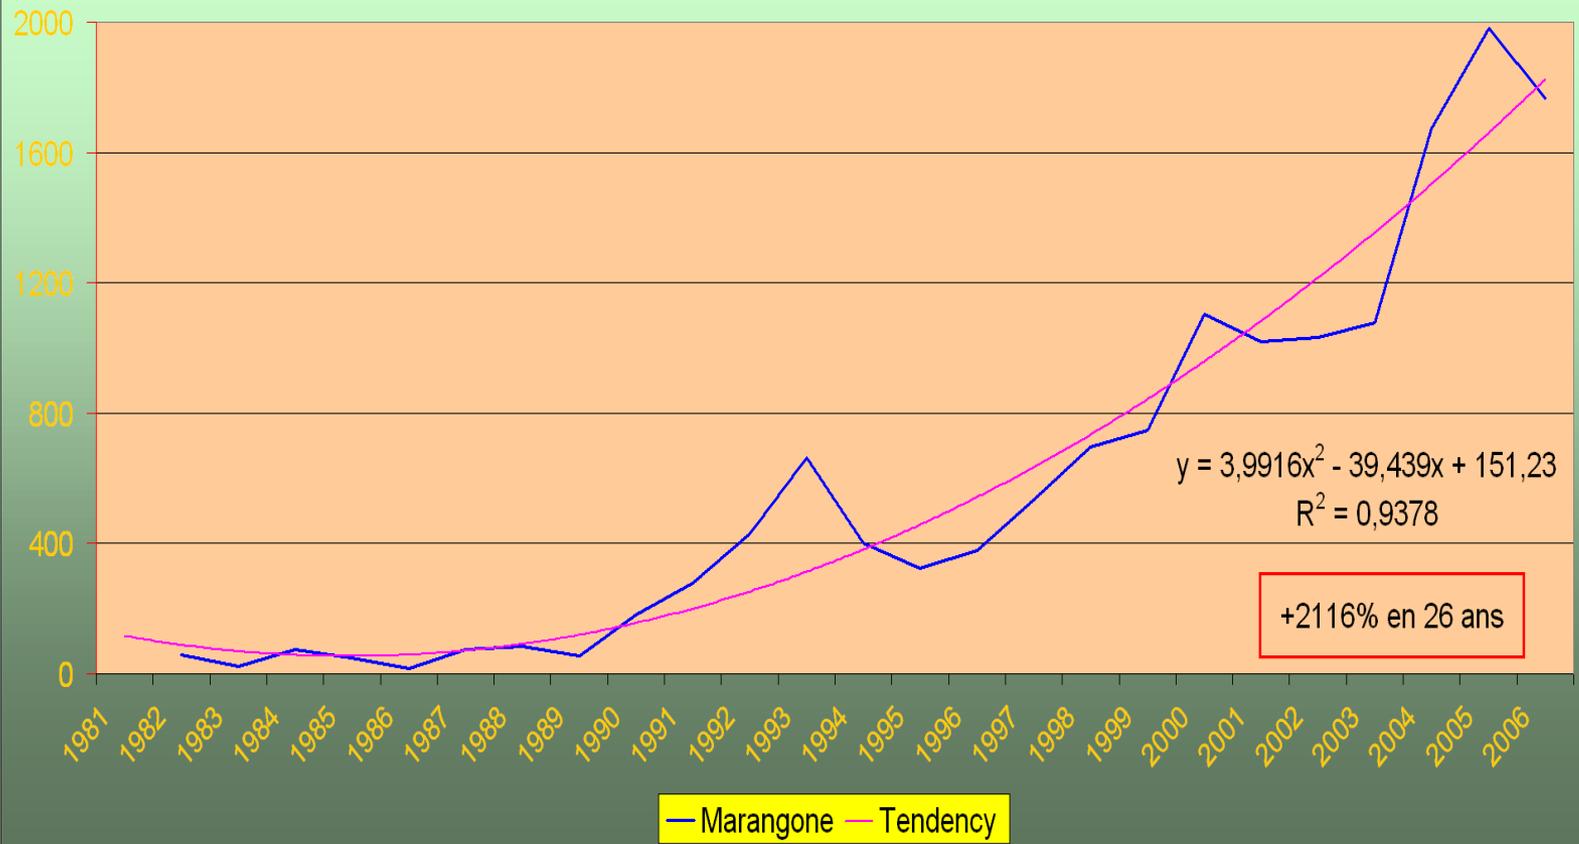

Grand Cormoran

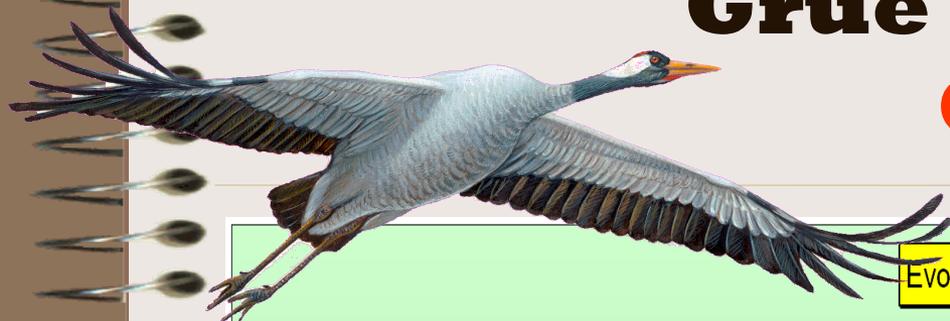

Marangone

Evolution since 1981

Grue cendrée

Gru

Evolution since 1981
